### About the Database

Over 36% of titles utilized in SpringerLink were duplicated in other LLC databases. A high rate of duplication, high per-use costs (\$6.59 per article download), and low utilization of the database (83% of all titles were not used since our subscription began in 2012) contributed to our nonrenewal decision. Although the vast majority of CSC faculty, students, and staff will be unaffected, a few of our patrons should note that the following journals will no longer appear in any of our databases:
